OUR HERITAGE

FOUNDED IN 1958

Truedor

THE FINE ART OF COMPOSITE DOORS

Truedor is a range of strong, long lasting and affordable GRP composite doors. We choose to work with GRP composite material because it is robust, it won't warp and delivers the same aesthetic appeal as timber but with none of the disadvantages. Why use anything else? Across all our collections, our quality front door styles can be coloured and finished to your personal specification.

Our fully trained staff take great pride in every door-set produced in our factory and are trusted to ensure that nothing leaves the premises without meeting strict quality criteria and undergoing thorough testing.

IG was founded in South Wales in 1958 and Composite Door production began in 1979. Between 1979 and 2018 we manufactured and supplied an extensive range of high performance external door-sets from our manufacturing facility in Cwmbran, before moving to a brand new high-tech facility in Blackwood.

Ongoing investment in our manufacturing facility, including the purchase of some of the most advanced production equipment in the UK will continue to spearhead our growth.

We continue to be industry leaders by providing a flexible and cost-effective product range backed by our exemplary service record and years of experience.

FOR OVER 35 YEARS, IG DOORS, THE COMPANY BEHIND TRUEDOR, HAS MANUFACTURED THE FINEST QUALITY DOORS USING TRIED AND TRUSTED TECHNIQUES THAT ARE PASSED ON BY EXPERIENCED, SKILLED PROFESSIONALS

TRULY FRIENDLY TO THE ENVIRONMENT

IG Doors, the company behind Truedor, recognises its important role in conserving the environment for future generations and aims to pursue a sound environmental strategy through the implementation of its environmental policy and by setting annual environmental objectives and targets.

The responsibility for implementing the environmental policy lies with the management team, assisted by employees at all levels.

The Company encourages staff training and development to ensure that commitment to the policy can be fulfilled. The main aspects of the Company's strive for environmental excellence include:

- the prevention of pollution
- a reduction in energy consumption
- a reduction in waste generation
- an increase in the use of sustainable materials

IG Doors Ltd achieved certificate BS EN ISO 14001.

With four styles, a great number of glazing options and colour choices, the four panel Cézanne makes a smart addition to any home.
